SUMMARY

Computer Science Engineering undergraduate (2027) with hands-on experience in Java backend development using Spring Boot, Hibernate (JPA), REST APIs, and MySQL. Strong foundation in OOP, DSA, and problem solving.

EDUCATION

Bachelor of Technology – Computer Science Engineering

Mohan Babu University

Expected Graduation: 2027

CGPA: 8.52

TECHNICAL SKILLS

Programming Languages: Java (Core Java, OOP), SQL, JavaScript

Backend Technologies: Spring Boot, REST APIs, Hibernate (JPA), Maven

Database: MySQL, SQL Queries, JOINS, Aggregation

Version Control: Git, GitHub

CS Fundamentals: Data Structures & Algorithms, OOP, Exception Handling, Collections Framework, Problem Solving

PROJECTS

Event Registration System [GitHub: View Project](#)

- Built a Spring Boot and MySQL based Event Registration System.
- Developed REST APIs for event creation, search, registration, and cancellation.
- Implemented duplicate registration prevention using email-event validation.
- Designed entity relationships between events and registrations using Hibernate (JPA).
- Automated slot availability updates during registration and cancellation operations.

URL Shortener Web Application [GitHub: View Project](#)

- Developed a URL Shortener application using Spring Boot and MySQL.
- Built REST APIs for short URL generation and URL redirection.
- Implemented unique short-code generation and persistent URL storage.
- Designed database-driven URL mapping using Hibernate (JPA).
- Applied layered architecture with Controller, Service, and Repository components.

PROBLEM SOLVING & ACHIEVEMENTS

- Solved **100+ DSA problems** on **LeetCode**, strengthening problem-solving and algorithmic thinking.
- Practiced Java programming with focus on **Object-Oriented Programming (OOP)** and core programming concepts.
